**QUIETING DOWN**

We expected to see a slight war panic among householders as there seemed evident an increase in commodity prices. Goods would be affected at higher than normal prices, but after the first rush to prevent private shortage, the buyers realized this nation is equipped to care for its own with a surplus in commodities. We feel we will be protected from the war profiteer who causes an increase in prices. A legitimate and reasonable profit is not unreasonable and is expected when war prices create a certain rise. But save us from the extensive profiteering of 1914. The sensible purchase of everyday produce, the wise buying of staples, will help business to keep its head, if the purchaser keeps his.

Since necessity is the mother of invention, German scientists have produced newspaper made from potato plant fiber. An edition of a certain newspaper of 100,000 copies was on this potato paper. Since Germany is the largest producer of potato in the world, they can make a quantity of paper! The potato crop is five times that of the U. S. and since it is a major food item, the people of Germany are careful to tend the crop and to rid it of potato bugs which have been invading the farms. Potatoes are fed to live stock for feed. Germany has a shortage of many materials and must avail herself of all chances to turn synthetic and substitute materials to her use.
